

Artificial Intelligence & Machine Learning - Great Learning Hub

Course Overview:

Learn how to build intelligent systems using Artificial Intelligence and Machine Learning with real-world applications and hands-on projects.

Key Learning Outcomes:

- AI & ML fundamentals
- Python for AI
- Data preprocessing
- Model building & evaluation
- Deep learning basics

Course Curriculum:

Module 1: AI Basics

Module 2: Python

Module 3: Data Processing

Module 4: ML Models

Module 5: Deep Learning

Module 6: Projects & Deployment

Tools & Technologies:

Python, NumPy, Pandas, Scikit-learn, TensorFlow, Jupyter Notebook

Career Opportunities:

AI Engineer, ML Engineer, Data Scientist, AI Developer

Course Duration:

4 to 6 Months

Why Choose Great Learning Hub?

- Practical projects
- Industry-focused training
- Expert mentorship
- Certification

Certification:

Professional certificate after completion
